## TECHNICAL NOTES FOR SELECTED CALIFORNIA REPORTABLE DISEASES PROVISIONAL MONTHLY SUMMARY REPORT:

In interpretation of the numbers in this report, please consider the following points:

- \* Because of inherent delays in case reporting and depending on the length of follow-up clinical, laboratory and epidemiologic investigation, cases with estimated onset dates may be added or rescinded after the date of this report. Therefore, data in this report, particularly for the more recent months, are provisional and may differ from data published in future reports.
- \*\* Estimated onset date is the date closest to the time when symptoms first appeared. Since date of onset may not be recorded, the estimated onset date can range from the date of first appearance of symptoms to the date the report was made to California Department of Public Health.
- \*\*\* For cases diagnosed with the following diseases, only those confirmed were included: Botulism (foodborne, wound, and other), Cholera, Ciguatera Fish Poisoning, Coccidioidomycosis, Domoic Acid Poisoning, Hantavirus Infection, Legionellosis, Leprosy (Hansen's Disease), Listeriosis, Plague (human), Rabies (animal and human), Staphylococcus aureus Infection (cases resulting in death or ICU).

For cases diagnosed with the following diseases, only those confirmed and probable were included: Amebiasis, Anaplasmosis/Ehrlichiosis, Anthrax, Babesiosis, Brucellosis, Campylobacteriosis, Creutzfeldt-Jakob Disease and other Transmissible Spongiform Encephalopathies, Cryptosporidiosis, Cyclosporiasis, Cysticercosis/Taeniasis, Dengue, E. coli O157, E. coli Other STEC (non-O157), Giardiasis, Hemolytic Uremic Syndrome, Hepatitis E (acute infection), Leptospirosis, Lyme Disease, Malaria, Paralytic Shellfish Poisoning, Psittacosis, Q Fever, Relapsing Fever, Salmonellosis, Scombroid Fish Poisoning, Shiga Toxin Positive Feces (without culture confirmation), Shigellosis (Groups A, B, C, D, and Unspecified), Spotted Fever Rickettsiosis, Streptococcal Infection (cases in food and dairy workers), Toxic Shock Syndrome (Non-Streptococcal), Trichinosis, Tularemia, Typhoid Fever, Typhus Fever, Vibrio Infection (non-Cholera), Yellow Fever, Yersiniosis.

For cases diagnosed with the following diseases, only those closed by the state were included: Anthrax, Botulism (foodborne, wound, and other), Brucellosis, Cholera, Ciguatera Fish Poisoning, Cysticercosis/Taeniasis, Dengue, Domoic Acid Poisoning, E. coli O157, E. coli Other STEC (non-O157), Hantavirus Infection, Hemolytic Uremic Syndrome, Legionellosis, Leptospirosis, Lyme Disease, Malaria, Plague (human), Psittacosis, Q Fever, Rabies (animal and human), Relapsing Fever, Spotted Fever Rickettsiosis, Staphylococcus aureus Infection (cases resulting in death or ICU), Toxic Shock Syndrome (Non-Streptococcal), Trichinosis, Tularemia, Typhoid Fever, Typhus Fever, Yellow Fever.

For LHDs with surveillance systems that do not provide resolution and process status, all reported cases were included.

- \*\*\*\* Because some diseases may be counted in more than one category, and because subcategories may be totaled, the sum of each column may not equal the total found in the Total row.
- (1) Where applicable a case of Hemolytic Uremic Syndrome may also be reported as "E. COLI / STEC."
  - (2) Staphylococcus aureus infection (only a case resulting in death or admission to an intensive care unit of a person who has not been hospitalized or had surgery, dialysis, or residency in a long-term care facility in the past year, and did not have an indwelling catheter or percutaneous medical device at the time of culture).
